5S WORKPLACE ORGANISATION & VISUAL MANAGEMENT

BUILDING SAFER, MORE EFFICIENT HEALTHCARE ENVIRONMENTS

Create Safer, Cleaner, and More Efficient Clinical Workspaces

Are your teams working in environments that support safety, efficiency, and high-quality care? Our 5S Workplace Organisation Training Course equips healthcare and aged care teams with practical tools to create structured, clutter-free, and highly visual work environments that improve safety, reduce waste, and support compliance. This course goes beyond housekeeping — it builds a disciplined, sustainable system that improves workflow, reduces risk, and supports continuous improvement.

WHY CHOOSE THIS COURSE?

Disorganised workplaces create risk, inefficiency, and unnecessary stress — especially in healthcare environments where safety is critical

THIS COURSE HELPS ORGANISATIONS:

- Improve workplace safety by removing hazards and clutter
- Reduce time wasted searching for equipment and supplies
- Improve infection control and cleanliness standards
- Support audit readiness and compliance expectations
- Create a visual workplace where problems are immediately visible
- Build a culture of ownership, discipline, and continuous improvement

IDEAL FOR:

- Aged Care Facilities
- Hospitals and Day Surgeries
- Clinics and Medical Centres
- Sterile Services / CSSD
- Healthcare Support Services

TRANSFORM YOUR WORKPLACE. IMPROVE SAFETY. REDUCE WASTE.

WHAT YOU WILL LEARN

1. Understanding 5S and Its Role in Healthcare

How 5S creates safer, more efficient workplaces by removing waste, improving flow, and supporting patient safety.

2. Sort - Removing Risk and Unnecessary Items

How to eliminate clutter, unsafe items, and non-essential materials from clinical and support areas.

3. Set in Order - Creating a Visual Workplace

How to organise equipment and supplies so everything is easy to find, use, and return — reducing time and errors.

4. Shine - Cleaning to Inspect and Improve Safety

Moving beyond cleaning to “clean to inspect,” identifying faults, hazards, and abnormalities early.

5. Standardise - Creating Consistent Safe Practices

How to develop standard procedures so all staff follow the same safe, efficient processes.

6. Sustain - Preventing Workplace Decline (Entropy)

Understanding that without discipline, workplaces naturally fall into disorder (high entropy) — and how audits, visual controls, and habits maintain standards over time.

7. Identifying and Eliminating Waste (D.O.W.N.T.I.M.E)

Recognising the 8 wastes in healthcare environments such as motion, waiting, over-processing, and defects.

8. Building a Culture of Ownership and Continuous Improvement

How to engage staff, sustain improvements, and create environments where safety, quality, and efficiency continuously improve.

COURSE FORMAT

- **Onsite Training** - Delivered within your facility using real work areas.
- **Christchurch-Based Training** - Ideal for group sessions across multiple sites.
- **Practical Walk-Through Option** - Apply 5S principles live in your workplace environment.
- **1:1 Training** - Tailored sessions for managers and improvement leaders.

WHY CHOOSE EAGLE PRECISION CONSULTANCY?

Training delivered by experienced professionals in:

- Healthcare environments and compliance
- Lean methodology and continuous improvement (20 Years)
- Quality management systems (ISO 9001, 14001, 27001)
- Workplace safety and risk reduction

We combine Lean principles with real-world healthcare application, ensuring immediate, practical results.
